*This app service is **NOT** always on in free tier app service plan, so it will take a few minutes to load in the first time.

Diagram 1: Change in OI

Show the sum of the number of the **change of open interest** per day when strike price is less than close price in PUT option which will be expired after a month.

Show the sum of the number of the **change of open interest** per day when strike price is larger than close price in CALL option which will be expired after a month.

Show the SMA of the **change of open interest** in CALL & PUT option

After inputting the SMA days, click the button to generate the signals if PUT SMA crosses CALL SMA.

SMA from Change in OI (Call & Put) : Range from 1 - 100 day(s).

Generate SMA from Change in OI (Call & Put) Signals)

Diagram 2: IV Diff. in Put - Call

If the input value moneyness difference is 10, it will put the **IV** in PUT option to minus the **IV** in CALL option, which will be expire after a month, with both **out of money** (10% moneyness difference).

After inputting the moneyness difference value, click the button to generate the signals if today's value is larger than yesterday's value.

Money Diff. : +/-2% by default. Range from 2 - 10.

Generate IV Diff. in Put - Call from Money Diff. Signal(s)

After inputting two SMA days and moneyness difference value, click the button to generate the signals if 1st SMA crosses 2nd SMA.

SMA from IV Diff. (Put - Call) : Range from 1 - 100 day(s).

SMA from IV Diff. (Put - Call) : Range from 1 - 100 day(s).

Money Diff. : +/-2% by default. Range from 2 - 10.

Generate IV Diff. in Put - Call from SMA Signal(s)

After inputting the range and opening the console, click the button to loop through all possibility to get parameters in the global optimum solution.

SMA (From) SMA (To) Mon. Diff. (From) Mon. Diff. (To) Day Hold (From) Day Hold (To)

Generate the best solution from above IV Diff. in Put - Call from SMA Signal(s) in console

SMA from IV Diff. (Put - Call) : Range from 1 - 100 day(s).

Money Diff. : +/-2% by default. Range from 2 - 10.

Generate IV Diff. in Put - Call from SMA Signal(s)

5 10 2 7 3 10

Generate the best solution from above IV Diff. in Put - Call from SMA Signal(s) in console

Rolling Regression Day : 15 by default

Rolling Regression Signal Value

Generate Rolling Regression Signal(s) from Percentage Change in this Stock Price v.s. Daily Change in IV - HV

Generate Rolling Regression Signal(s) from Percentage Change in Stock (2600) Price v.s. Percentage Change in this Stock Price

Filter

Capital: \$10000 by default.

Day(s) Stock Hold: 999999999 working days by default.
