*This app service is NOT always on in free tier app service plan, so it will take a few minutes to load in the first time.
*It is a demo frontend website with fake data and no backend is supported, so you can enter anything in username and password to login

Part 1: Login

The screenshot shows a web browser window with the address bar displaying 'luimanhon.azurewebsites.net'. The browser's tab bar includes several open tabs: 'Apps', 'Movie', 'Japanese', 'Online Course', 'Job', 'Reference', 'Azure', 'PolyU', 'NETGEAR Router R...', 'Keyboard Ear Traini...', 'Open Water Diver e...', 'My Drive - Google...', and 'Yahoo Mail'. The website's header is a teal bar with the text 'CRIF Classification System'. Below the header, the login form is centered. It consists of two input fields: 'User ID' with the placeholder text 'Enter User ID' and 'Password' with the placeholder text 'Enter Password'. Below these fields is a green 'Login' button.

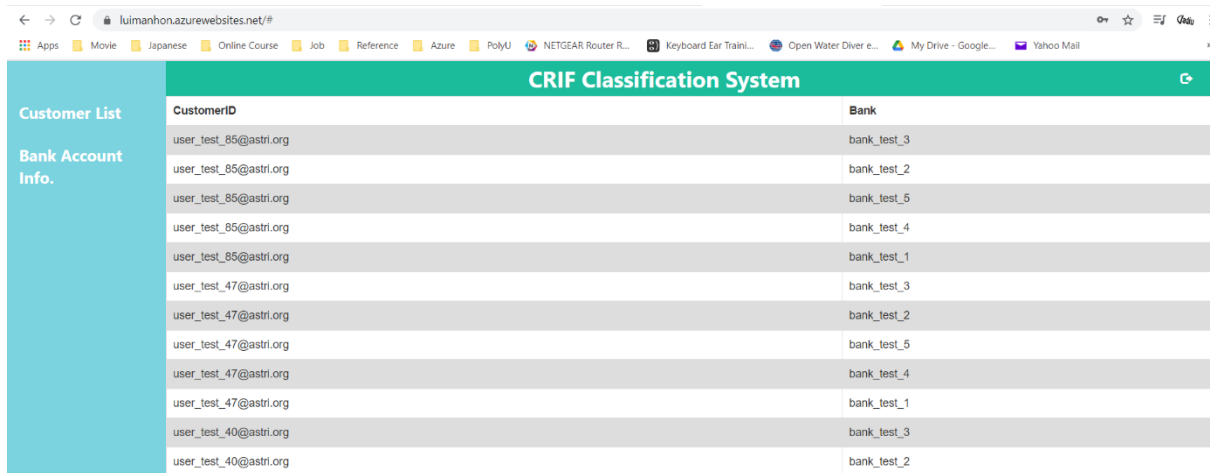

After entering invalid username and password:

This screenshot shows the same login page as before, but with an error message displayed below the 'Login' button. The error message is contained within a red box with a white border and a close button (an 'X' icon) on the right. The text of the error message is 'ERROR: Username or password is invalid.'.

After successful login:

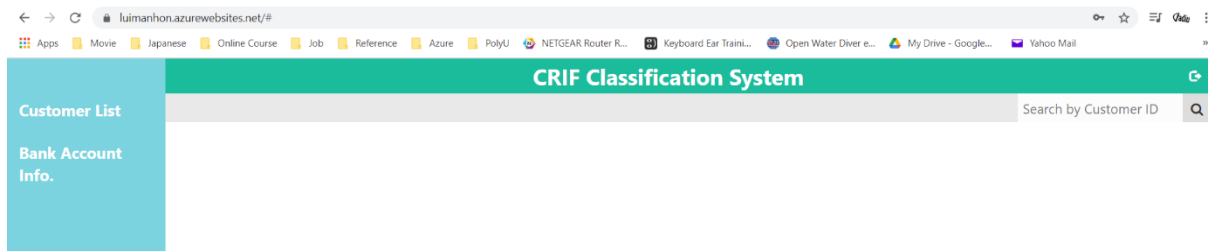

The screenshot shows the dashboard after a successful login. The browser window is the same. The website's header is still 'CRIF Classification System'. On the left side, there is a light blue sidebar containing two menu items: 'Customer List' and 'Bank Account Info.'. The main content area of the dashboard is currently empty.
